MEDICINES (GENERAL SALE LIST) (JERSEY) ORDER 1997¹

THE HEALTH AND SOCIAL SERVICES COMMITTEE in pursuance of Articles 50 and 110 of the [Medicines \(Jersey\) Law 1995](#), after consultation with the Medicines Advisory Council and having otherwise complied with Article 110 of the Law, orders as follows –

Commencement [[see endnotes](#)]

1 Interpretation

- (1) In this Order, unless the context otherwise requires –

“aspirin equivalent” means, in relation to a quantity of aloxiprin, the quantity of aspirin that is equal in weight to 81.25% of that quantity of aloxiprin;

“cosmetic” means any substance or preparation –

- (a) that is intended to be applied to any one or more of the various surfaces of the human body, including the skin, pilary system and hair, nails, lips and external genital organs, and the teeth and buccal mucosa; and
- (b) is so intended wholly or mainly for the purpose of perfuming them, cleansing them, protecting them, caring for them or keeping them in condition, modifying their appearance (whether for aesthetic purposes or otherwise) or combating body odours or normal body perspiration;

“dosage unit” means –

- (a) where a medicinal product is in the form of a tablet or capsule or is an article in some other similar pharmaceutical form, that tablet, capsule or other article; and
- (b) where a medicinal product is not in any such form, that quantity of the product that is used as the unit by reference to which the dose is measured;

“effervescent”, in relation to a tablet, means containing not less than 75%, by weight of the tablet, of ingredients included wholly or mainly for the purpose of releasing carbon dioxide when the tablet is dissolved or dispersed in water;

“enema” means a preparation that is to be administered into the rectum as an aqueous or oily solution or suspension;

“excipient” means a substance that does not contribute to the pharmacological action of a medicinal product, or that contributes only by regulating the release of the active ingredients;

“external use” means application to the skin, hair, teeth, mucosa of the mouth, throat, nose, ear, eye, vagina or anal canal, when a local action only is intended and extensive systemic absorption is unlikely to occur; but does not mean application by means of a throat spray, throat pastille, throat lozenge, throat tablet, nasal drop, nasal spray, nasal inhalation or teething preparation;

“food” includes –

- (a) beverages and confectionery;
- (b) substances and articles used as ingredients in the preparation of food; and
- (c) any manufactured substance to which there has been added any vitamin and which is advertised as being available and for sale to the general public as a dietary supplement;

“irrigation” means bathing by means of the application of a fluid in a continuous stream;

“Law” means the [Medicines \(Jersey\) Law 1995](#);

“maximum daily dose” or “MDD” means, in relation to a substance contained in the amount of a medicinal product for internal use, the recommended maximum quantity to be taken or administered in a period of 24 hours;

“maximum dose” or “MD” means, in relation to a substance contained in the amount of a medicinal product for internal use, the recommended maximum quantity to be taken or administered at any one time;

“maximum strength” means such of the following as may be specified –

- (a) the maximum quantity of a substance by weight or volume contained in a dosage unit of a medicinal product;
- (b) the maximum number of units of activity contained in a dosage unit or a weight of a medicinal product; and
- (c) the maximum percentage of a substance contained in a medicinal product calculated in terms of weight in weight, weight in volume, volume in weight or volume in volume, as appropriate;

“medicinal product” does not include a veterinary drug;

“parenteral administration” means administration by breach of the skin or mucous membrane;

“prescription only medicine” has the same meaning as it has in Article 1(1) of the [Medicines \(Prescription Only\) \(Jersey\) Order 1997](#);

“product licence of right” means a product licence, whether or not for the time being in force, to which a person is entitled by reason of Article 26 of the Law; and a reference to a medicinal product that is the subject of a product licence of right is a reference to a medicinal product in respect of which there is or was in force, at the time of its manufacture, a product licence of right.

- (2) In Schedules 1 and 2 –
 - (a) the following abbreviations are used –
 - “g” for gram;
 - “iu” for international unit of activity;
 - “mcg” for microgram;
 - “mg” for milligram; and
 - “ml” for millilitre;
 - (b) entries in any of columns 2, 3 and 4 in any Table in those Schedules relate only to the substances specified in column 1 against which they appear; and
 - (c) where, in relation to a particular substance specified in column 1, an entry in any of columns 2, 3 and 4 bears a number or letter, that entry relates only to entries in the other of columns 2, 3 and 4 that bear the same number or letter.
- (3) Without prejudice to Article 10 of the [Interpretation \(Jersey\) Law 1954](#), every provision in the [Medicines \(Jersey\) Law 1995](#) that relates in any other way to its interpretation shall also apply in the same way to this Order, unless the context otherwise requires.

2 General sale list

There are specified, as classes of medicinal products that in the opinion of the Minister can with reasonable safety be sold or supplied otherwise than by or under the supervision of a pharmacist –

- (a) medicinal products that fall within the class specified in Schedule 1, but –
 - (i) are not prescription only medicines,
 - (ii) are not subjects of product licences of right, and
 - (iii) do not fall within a class specified in Schedule 3;
- (b) medicinal products that fall within the class specified in Schedule 2 and are subjects of product licences of right, but –
 - (i) are not prescription only medicines, and
 - (ii) do not fall within a class specified in Schedule 3; and
- (c) medicinal products that are for sale or supply either for oral administration as foods, or for external use as cosmetics, but –

- (i) are not prescription only medicines,
- (ii) are not eye drops or eye ointments,
- (iii) do not contain any of the following substances with a maximum daily dose that is equivalent to more than 7500 international units of vitamin A or 2250 micrograms of retinol, namely vitamin A, vitamin A acetate and vitamin A palmitate, and
- (iv) do not contain vitamin D with a maximum daily dose exceeding 400 units of antirachitic activity.

This Order may be cited as the Medicines (General Sale List) (Jersey) Order 1997.

SCHEDULE 1²

(Articles 1(2) and 2(a))

MEDICINAL PRODUCTS ON GENERAL SALE BY VIRTUE OF ARTICLE 2(a)

- 1** Subject to paragraphs 2 and 3, the class of medicinal products that are composed solely of one or more of the following substances, namely –
 - (a) a substance specified in column 1 of Table A where the maximum strength of the substance in the medicinal product does not exceed the maximum strength (if any) specified in column 2 of that Table;
 - (b) if the product is for external use only, a substance specified in column 1 of Table B, where the maximum strength of the substance in the medicinal product does not exceed the maximum strength (if any) specified in column 2 of that Table;
 - (c) an aqueous or alcoholic extract, spirit, syrup or liquid suspension derived from a substance specified in column 1 of Table A or (if the product is for external use only) in column 1 of Table B; and
 - (d) an excipient.
- 2** Where a medicinal product of the class specified in paragraph 1 has as an ingredient a substance specified in column 1 of Table A or in column 1 of Table B, and there is in relation to that substance an entry in column 3 of that Table, that product only if –
 - (a) where a use is specified in column 3, the product is in a container, or package, that is labelled to show that use only; and
 - (b) where a pharmaceutical form or route of administration is specified in column 3, the product is in that pharmaceutical form or is for administration by that route, as the case requires.
- 3** Where a medicinal product of the class specified in paragraph 1 (other than a product for external use only) has as an ingredient a substance specified in column 1 of Table A, and there is in relation to that substance an entry in column 4 of that Table, that product only if it is in a container, or package, labelled to show –
 - (a) where a maximum dose is specified in column 4, a maximum dose not exceeding that specified; and
 - (b) where a maximum daily dose is specified in column 4, a maximum daily dose not exceeding that specified.

(Articles 1(2) and 2(b))

MEDICINAL PRODUCTS ON GENERAL SALE BY VIRTUE OF ARTICLE 2(b)

- 1** Subject to paragraphs 2 and 3, the class of medicinal products that are composed solely of one or more of the following substances, namely –

 - (a) a substance specified in column 1 of Table A, where the maximum strength of the substance in the medicinal product does not exceed the maximum strength (if any) specified in column 2 of that Table;
 - (b) if the product is for external use only, a substance specified in column 1 of Table B, where the maximum strength of the substance in the medicinal product does not exceed the maximum strength (if any) specified in column 2 of that Table;
 - (c) an aqueous or alcoholic extract, spirit, syrup or liquid suspension derived from a substance specified in column 1 of Table A or (if the product is for external use only) in column 1 of Table B;
 - (d) an excipient;
 - (e) haemoglobin or any of the following parts of animals, namely, bone, horn, brain, genitals, prostate and spleen (but not being an extract from any of those parts);
 - (f) a glycerine extract of bone marrow;
 - (g) a bovine blood derivative; and
 - (h) a substance of vegetable origin or an extract of such a substance used in Jersey as a food.
- 2** Where a medicinal product of the class specified in paragraph 1 has as an ingredient a substance specified in column 1 of Table A or in column 1 of Table B, and there is in relation to that substance an entry in column 3 of that Table, that product only if it is for such use, in such pharmaceutical form and for administration by such route, as may be specified in column 3.
- 3** Where a medicinal product of the class specified in paragraph 1 (other than a product for external use only) has as an ingredient a substance specified in column 1 of Table A, and there is in relation to that substance an entry in column 4 of that Table, that product only if it is in a container, or package, labelled to show –

 - (a) where a maximum dose is specified in column 4, a maximum dose not exceeding that specified; and
 - (b) where a maximum daily dose is specified in column 4, a maximum daily dose not exceeding that specified.
